

Ground-Level Observations

EMPOWERING RURAL HEALTHCARE: INSIGHTS FROM GROUND-LEVEL
FIELD RESEARCH

“

”

Visited the Chief Veterinary Officer's Office to collect information and understand veterinary healthcare challenges.

Field Interaction With Chief Veterinary Officer

We Had The Opportunity To Meet The Chief Veterinary Officer In Person And Present Our Goraksha – Pashu Sanjeevini Project In Detail. During The Meeting, We Explained The Project's Objectives, Features, And Its Potential Benefits For Farmers And Livestock Owners In Rural Areas. We Discussed Challenges Faced In Accessing Timely Veterinary Services And Demonstrated How GORAKSHA Can Provide Emergency Support, First-aid Guidance, Doctor Search Facilities, And Information On Government Schemes. The Officer Appreciated The Initiative And Provided Valuable Suggestions To Further Improve The Project And Make It More Beneficial For The Farming Community.

We visited the Office of the Deputy Director, Animal Husbandry Department, as part of our field survey to collect information for the GORAKSHA project.

Field Research Documentation

Field Survey / Problem Identification

In rural areas, many veterinary hospitals are not functioning properly. Some hospitals have been closed or are in poor condition due to a shortage of staff, lack of infrastructure, and inadequate maintenance. As a result, farmers face difficulties in accessing veterinary services during emergencies.

To better understand this problem, our team visited several local villages and surveyed veterinary hospitals. We interacted with farmers and observed the challenges they face in obtaining timely animal healthcare services. Based on the findings of this field study, we developed the GORAKSHA – Pashu Sanjeevini project to provide accessible and timely support for animal healthcare in rural communities.

We surveyed farmers from **villages** and found that many lacked access to proper veterinary facilities and emergency animal healthcare services. Their feedback helped us design the GORAKSHA project.
